

Bailey Engineering Warranty Policy.

Bailey Engineering warrants all products we manufacture to be free of defects in materials or workmanship for a period of 1 year from the date of original retail purchase.

Customers should contact their dealer for after-sale support, since in many cases, issues can be resolved with a setting or adjustment.

Products can be sent in for repair. For warranty consideration a copy of the original purchase receipt must be included. In-warranty repairs will be completed and the unit returned at no charge. Out-of-warranty units will have a minimum non-refundable charge of 25.00 for evaluation. This charge will be applied to any repair charges, if approved. If the customer declines the repair estimate, then the unit will be returned.
